📍 Saskatoon, SK

## EDUCATION

### COMPUTER SYSTEMS TECHNOLOGY

Saskatchewan Polytechnic | Sept 2023 – June 2025

- Achieved a strong understanding of programming languages such as Java, Python, and C#.
- Completed extensive coursework in software development, data structures, algorithms, and system design.
- Collaborated on an AI-assisted database mapping tool for an industry client, implementing server-side functionality in PHP.
- Used Git for version control, resolving merge conflicts and coordinating team-based development.
- Designed and built full-stack web applications using Vue.js, Node.js, JavaScript, HTML, and CSS.

## EXPERIENCE

### STUDENT RESEARCH ASSISTANT

Digital Integration Centre of Excellence | May – Aug 2025

- Developed an AI-assisted information retrieval system using Python.
- Collaborated within a large-scale codebase while following best practices for documentation, testing, and code quality.
- Debugged and improved existing functionality by identifying problems and proposing effective solutions.
- Took ownership of assigned tasks, proactively identifying issues and suggesting improvements.
- Collaborated closely with team members and accepted constructive feedback during code reviews.

### LANDSCAPER

Clear Cutt Landscaping Inc. | Jan – Apr 2023

- Worked independently under minimal supervision while meeting quality and safety standards.
- Maintained professional relationships with clients through reliable and quality work.

### CONSTRUCTION WORKER

Con-Tech General Contractors Ltd. | Apr – Nov 2022

- Maintained a safe, organized work environment on residential and commercial job sites.
- Adapted quickly to changing tasks and physical demands.
